SPACE SOLUTIONS | 800.782.1500 | WILLSCOT.COM

Solar Power by WillScot is the first customizable solar energy solution for temporary space, giving you the power to work from anywhere.

Our innovative solar solution is designed to allow projects to be rapidly and economically deployed wherever you need it. This new modular and scalable system provides immediate energy production, energy storage and monitoring, and sustainability adherence. Perfect for a unique range of industries and uses, Solar Power by WillScot can work as a dedicated, sustainable power source or as a hybrid solution in combination with generators or grid power.

Solar Power by WillScot is a perfect solution for whatever your next project is, providing temporary storage and workspace power for team members. It is especially well-suited for:

- Commercial Construction/General Contractors
- Industrial/Manufacturing
- Retail
- Energy
- Events

Deploy Solar Power by WillScot at your jobsite for convenience, flexibility and sustainability.

CONVENIENCE

Time is money, and jobsite projects can't wait. Tight timelines and budgets put a premium on your project's operational efficiency. Solar Power by WillScot provides immediate energy production. Which means no more waiting for grid connections or temporary power installation.

It's designed for your unit, delivered with your unit, and connected onsite by a licensed electrician.

FLEXIBILITY

Jobsite power can be complicated. Choices are usually restricted to either running generators or tapping into utility power. With Solar Power by WillScot, you can harness the sun to power your portable office trailer exclusively with solar. Or, if you prefer, you can connect your trailer to the power grid or generators to provide incremental power or backup to solar.

More choices means more control. Get the jobsite power you need where and when you need it.

SUSTAINABILITY

Compared to using a generator, the grid, or both, solar energy significantly reduces greenhouse gas emissions. Beyond clean energy, Solar Power by WillScot also provides energy storage and monitoring, helping you adhere to sustainability goals. And to ensure you have all the power you need, WillScot comes with an easy-to-read dashboard for customers to track key energy-use information.

Plus, our solar units are virtually silent, making it easier for your teams to focus and get work done.

WillScot is Your Trusted Partner

WillScot is a leader in innovative space solutions dedicated to helping your project succeed. We pride ourselves on efficient service and high-quality products. Our local footprint, national presence and decades in business means we are here to serve you as your partner anytime, anywhere.

WillScot's commitment to the circular economy runs to our core. Once our temporary space solutions have been used for one purpose, they are then relocated, reconfigured, and refurbished to serve another customer, beginning the circle anew and allowing us to help our customers achieve their own sustainability goals.

Whatever your jobsite needs, we strive to make your project more manageable, cost effective, and successful. Contact a representative to learn more.
